## Subject: Information regarding tyre chain for 16 inch wheel is missing

The information regarding tyre chain for 16 inch tyres is missing in current Owner manual for Mazda6 GJ.

Tyre size	Tyre chain
225/55R17	Hexagon type
225/45R19	Hexagon type
215/65R16	Hexagon type

Future Owner Manual versions will be corrected.

If required, please print out the attachment and put it into the customer's Owner Manual.

Kind regards,

Frank Koch  
Manager CS Homologation, Documents & Tools  
Mazda Motor Europe GmbH

Before Driving  
**Driving Tips**

▼ **Tyre Chains**

Check local regulations before using tyre chains.

**⚠ CAUTION**

- Chains may affect handling.
- Do not go faster than 50 km/h (30 mph) or the chain manufacturer's recommended limit, whichever is lower.
- Drive carefully and avoid bumps, holes, and sharp turns.
- Avoid locked-wheel braking.
- Do not use chains on a temporary spare tyre; it may result in damage to the vehicle and to the tyre. Your vehicle is not equipped with a factory installed temporary spare tyre.
- Do not use chains on roads that are free of snow or ice. The tyres and chains could be damaged.
- Chains may scratch or chip aluminium wheels.

**NOTE**

If your vehicle is equipped with the tyre pressure monitoring system, the system may not function correctly when using tyre chains.

Install the chains on the front tyres only. Do not use chains on the rear tyres.

**Tyre chain selection (Europe)**

Mazda recommends hexagon type steel ring chains. Select the proper type according to your tyre size.

Tyre size	Tyre chain
225/55R17	Hexagon type
225/45R19	Hexagon type
215/65R16	Hexagon type

**NOTE**

Although Mazda recommends hexagon type steel ring chains, all chains within the installation specifications may be used.

**Installation specification (Europe)**

When installing tyre chains, the distance between the tyre tread and the chain must be within the prescribed limits in the following table.

Distance [Unit: mm (in)]	
A	B
MAX 11 (0.43)	MAX 11 (0.43)
