Friday, February 15, 2008**Fuel Cell Installation Complete****VAGINA!**

HAFC UPDATE - If I ever get this fucking kit I will definitely post it. 2-4 weeks is a shitlong time for an impatient human like me.

OPTION 2 UPDATE

Installation Complete - 2004 Rx8 - Water/Hydrogen Injection Fuel Cell

Technology - It uses the harmonics from your moms chin when I place my balls upon it and sing in a G flat. This separates the hydrogen into 2 products:

1. A mist of water, albeit small.
2. Hydrogen gas from the unit.
3. A smile on your mom's face.

Cost - 700+150 install = 850 total

Promise - 25% guarantee mpg inc. / up to 30% horsepower inc.

Delivery - 3 days flat

Support - Excellent

Required fuel for cell - Distilled water + isopyryl alcohol (50/50 - because it's winter)

(NOTE: Can add denatured alcohol to water (50/50) for more boost.)

Immediate results:

1. Less pressure on the pedal to get the same accel / hold speed.
2. Less wait for the power to kick in.
3. Quieter idle.
4. Longer coasting (in automatic or electronic manual)

To Do:

1. Run through my full tank of 93 (1-2 days) (need to go to 87 moving forward to see pure results.) (The definined boost from the kit is 108 octane IE: hydrogen / fuel / water mist mix)
2. Milage test at 89 & 87 (currently at 190 miles total for a 13 gallon tank)
3. Tuning the device (has a manual lever for frequency change)

once I figure the results of 2.

The meaning of life:

The problem with wiping your ass when you shit is that you are just going to have to shit again...so why wipe it in the first place, completely knowing that you will have to do it again in the future? Easy....It fucking stinks!

To anyone who actually is banging their head against a brick wall...Here's to you 😊

Say nay to naysayers!

Please note that I do not work for these people. They were just real nice, and helped me get this thing going in record time. My mechanics picked up on it super quick too.
