

**Subject:**

i-Mazda-R DICE iPod Integration Kit for Mazda, Radio Interface Kit.

**Models Supported:**

**Mazda**

Model	Year	Part Number	Known Limitations*	Compatible Radio Systems
B-Series PU	03-06	i-Mazda-R		Requires radio FW v.9.55
Mazda 3	04-06	i-Mazda-R		Requires radio FW v.9.55
Mazda 5	05-06	i-Mazda-R		Requires radio FW v.9.55
Mazda 6	03-06	i-Mazda-R		Requires radio FW v.9.55
Miata/MX5	96-05	i-Mazda-R		Requires radio FW v.9.55
Mazdaspd.	02-06	i-Mazda-R		Requires radio FW v.9.55
MPV	02-06	i-Mazda-R		Requires radio FW v.9.55
Protegé	02-03	i-Mazda-R		Requires radio FW v.9.55
RX8	04-06	i-Mazda-R		Requires radio FW v.9.55
Tribute	02-06	i-Mazda-R		Requires radio FW v.9.55

**Recommended Installation Time:**

All models - Approximately 60 mins

**Parts Information:**

**Kit Contents:**

1. DICE Module
2. Volkswagen radio interface cable (vehicle specific cable)
3. Docking Cable

*Please verify all parts before installation!*

**Basic Wiring Diagram:**

## Installation Instructions:

1. Pull vehicle into service bay and access center console.

2. Disconnect both battery terminals. These cables must be disconnected during installation to insure proper initialization of the DICE module when it is connected.

*Make sure you have the vehicle's radio security code before disconnecting the battery cables! Detailed steps for removing the Honda/Acura radio can be found in your factory manual this supplement will ONLY show an outline for radio removal.*

3. Twist the shift knob off by rotating it counter-clockwise. Remove the trim plate covering the Gear Selector which is held in place by plastic clips. Disconnect the seat heater control wiring.

4. Remove the front coin storage tray and power adapter.

5. Remove the Phillips screws holding the plastic trim and radio mount in place. Carefully pull the assembly away from the dash. The entire console will pull out along with the radio.

6. Locate the CD Changer wiring harness; this will be on the back of the radio. The DICE vehicle Interface Cable will need to connect to this port.

*It's recommended to install your DICE module in a easily accessible location or to extend the AUX connector for future connections of auxiliary devices.*

7. Connect the vehicle specific cable's 8-pin molex connector and iPod Docking Cable to the DICE module. The correct plugs on the DICE module can be identified by matching it up with the connector or by looking for the label on the bottom of the module.

1/8" AUX

Dock Cable

Vehicle Specific Cable

*This will be a good time to test your installation. Before reinstalling your radio, connect your iPod and test for audio, and controls from the radio. If everything is ok, proceed to the next step.*

9. Verify all connections and re-install the radio into the vehicle by sliding it into the tray until it locks into place. Route the docking cable as desired.

**!** Use caution around the factory wiring while reinstalling your radio. If the radio will not slide into place, do not try to force it in place. Pull the radio back out and check for any cables or other obstructions that may be in the path of the radio.

The DICE iPod Integration installation is now complete.
