Cabin Air Filter Replacement

Some customers may not be aware their vehicle is equipped with a cabin air filter which requires replacement as part of the scheduled maintenance. Replace the air filter according to the vehicle's scheduled maintenance. Refer to the appropriate WSM (Section 07-11) for air filter removal/installation instructions.

Models equipped with cabin air filter:

- **2001-02 Millenia (dual type)**
- **2000-04 MPV**
- **2003-04 Mazda6**
- **2004 RX-8**

Note: Although the 2004 Mazda3 WSM illustrates a dual type cabin air filter (page 07-11-5), it is only found on vehicles equipped with the “Auto A/C” system, which are not sold in the U.S.
