

M-TIPS

2004 RX-8/Mazda3 (w/Navi System)

Navigation System Info.

Customers may have various types of Navigation System questions or concerns. Listed below are some examples of questions that customers may ask regarding the system.

Will the Navigation System Play CDs or DVDs?

The Navigation System is not designed to play music CDs or movie DVDs. Doing so may cause system faults. Only a valid map disc can be operated with the system. The system is not capable of receiving TV broadcasts either.

Why is the Navigation System Clock Incorrect?

The Navigation System clock recognizes daylight savings time, however, some states do not (Arizona for example), therefore, the clock will be off by one (1) hour during daylight savings time. Daylight savings mode can be selected in menu options.

Why Doesn't the Navigation System Location Match the Vehicle Location?

If the vehicle has been moved by transport or tow truck with the ignition off, the Navigation System screen location may not match the vehicle location. The vehicle will need to be driven a few miles to lock onto the GPS and correct the vehicle location.

(Canada Only) Why Can't I Search By Postal Code?

A "ZIP CODE NOT FOUND" error will be displayed when entering a postal code within the Canada map area. Addresses must be searched by first entering the city, then street name, and street number.

Need Customer Service?

If help is required with the operation of the Navigation System, want to report a map database error, or wish to obtain a new map DVD, please call 1-888-NAV-MAPS (1-888-628-6277).
