

RX-8

New Front Cover Design RI5698

When installing an engine into an RX-8, you may notice the mount for the eccentric shaft position sensor on the front cover is shaped differently. This new design is compatible with all current eccentric shaft position sensors installed on all 2004-2008 RX-8 vehicles. Also, 2006-2008 RX-8 vehicles produced from 4/1/2006 use this new front cover design. DO NOT replace the front cover.
