Multiple Models

Retractable Keys

2005 Miata (with convenience pkg), MPV and RX-8 are equipped with new retractable keys with integrated keyless entry transmitters. The new keys and transmitters look similar however, they cannot be interchanged between vehicles. When performing PDI, ensure the 1/2" split key rings are attached to the transmitters (key rings larger than 1/2" in diameter will not fit these transmitters).

A service bulletin will be released soon, covering this information in greater detail.
