M-TIPS

All Models With TPMS TPMS Cannot Be Turned Off Or Reprogrammed RI5754

All Mazda vehicles equipped with Tire Pressure Monitoring System (TPMS) cannot be disabled or reprogrammed to lower or higher tire pressures. The National Traffic And Motor Vehicle Safety Act prohibits dealers from disabling the TPMS. If a dealer or aftermarket repair facility disables the TPMS, they can be subject to fines of \$6,000 per vehicle. Therefore, aftermarket wheels and tires are not recommended unless the factory TPMS sensors can be properly installed for the system to operate as designed.
