## Subject: Caution for Maintenance of Lights with Plastic Lens

### Description

This is to remind you that the plastic lens of lights can be damaged by strong acid or strong alkaline cleanser or organic solvent, if you use them for cleaning.

### Countermeasures

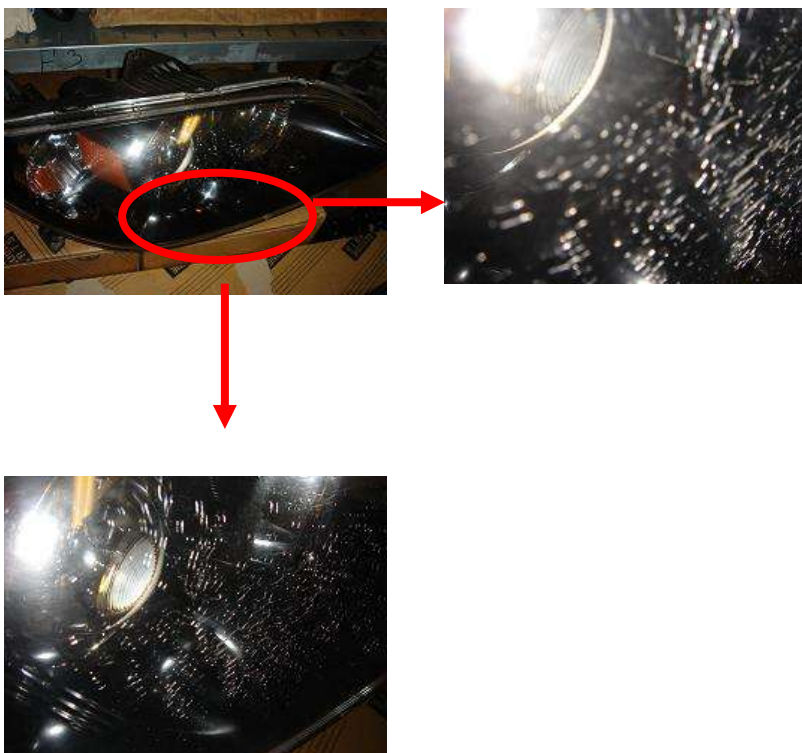

The plastic lens can be damaged by the following chemicals that possibly cause a problem on the lens surface. At worst, the functionality of the product could be seriously impaired. Therefore, please be careful not to use the following chemicals for cleaning or to prevent them from sticking to the products.

[Type of chemicals]

Strong acid cleanser, strong alkaline cleanser, or gasoline, kerosene, highly-concentrated alcohols, paints, organic solvents such as thinner.

Also, please do not use a stiff brush, in case it damages the lens surface.

### Instance of damage (crack in the lens due to a chemical)

Shinji Kanai  
Manager, Technical Information Group
