g-Force[™] Sport

Best-in-class dry handling* puts more sport in sport compact tires.

What it is: Class-leading g-Force^M performance at a price within reach of virtually every sport compact enthusiast. Great sport compact-style tread design.

Who it's for: Sport compact and sporty car owners looking for great performance at an affordable price. * According to tests at the LPG facility in South Carolina for V/Z dry performance summer-oriented tires.

Features:

- Cutting-edge tread design
- Two deep, wide circumferential rain channels
- Rounded shoulder profile
- Proprietary BlackTech[™] tread compound
- g-Control[™] Sidewall Inserts
- Dimensionally stable polyester carcass plies, ETEC System™ (Equal TEnsion Containment)
- Rim protector

Benefits:

- For a new-generation tread statement
- Help disperse water for excellent wet weather traction
- Improves progressivity and predictability at limit of adhesion \bigstar
- Excellent dry grip
- Resist deflection to generate tremendous cornering force
- Excellent strength, smooth ride and consistent footprint; maximum tread contact maintained under high-speed conditions
- Improved wheel damage protection☆
- W-speed rated; capable of speeds up to 168 mph[†]
- V-speed rated; capable of speeds up to 149 mph[†]

Two deep, wide circumferential rain channels

Proprietary BlackTech[™] tread compound

Dimensionally-stable polyester carcass plies, ETEC System™ (Equal TEnsion Containment System)

g-Control[™] Sidewall Inserts resist deflection

Rim protector

1. The dimensions shown are average values for tires measured on specified measuring rim width. Individual tires may from data showr

vary from data shown. 2. Section width varies approximately 0.2" (5mm) for every 0.5" change in rim width.

WARNING: Serious or fatal injury may result from tire failure due to underinflation or overloading. To assure correct air pressure and vehicle load, refer to vehicle owner's manual or tire information placard on the vehicle. Serious injury or death may result from explosion of tire/rim assembly due to improper mounting. Only tire professionals should mount tires and they should never inflate beyond 40 psi to seat beads. Before mixing types of tires in any configuration on any vehicle, be sure to check the vehicle owner's manual for its recommendations.

DANGER: Never mount a 16" diameter tire on a 16.5" rim. DANGER: Never mount a 17" diameter tire on a 17.5" rim.

Inflation pressure increase must not exceed the maximum pressure branded on the tire sidewall. When a customer requests a replacement tire with a lower speed rating than the original equipment tire, you must clearly communicate to him or her that the handling of the vehicle may be different, and that its maximum speed capability is limited to that of the lowest speed rated tire on the vehicle. Exceeding the lawful speed limit is neither recommended nor endorsed.

For high-speed driving, additional inflation pressure and possibly reduced tire loading and/or upsizing is required. In the absence of specific recommendations by the vehicle manufacturer, use the following guidelines based on those in the European Tyre and Rim Technical Organization Standards Manual.
