

MAZDA NORTH AMERICAN OPERATIONS
Accessory Operations
Updated August 2011

MNAO Accessory Operations announces the following updated installation information and application charts for the:

iPod® Integration Module

The iPod Integration Module will:

- Provide easy hook up to most iPod's with a 30 pin docking connector on the bottom (***see the attached iPod Compatibility Chart for iPod model specifications***)
- Install directly into the Mazda Modular Radio head unit (iPod not included)
- Mount neatly out of sight behind the dash (iPod is connected/placed in the glove box or console)
- Transfer control of the iPod to the vehicle radio or steering wheel controls (if so equipped)
- Charge the iPod battery (most iPods)

IMPORTANT NOTES (Please READ):

1. Not compatible with the iPhone and some versions of the iPod (see attached applicability chart)
2. See the application guides on page 2 - 5 for vehicle model application and iPod model compatibility
3. Through 2008MY, if vehicle is equipped with SIRIUS Satellite Kit or PhatNoise® accessories, the iPod Integration Module CANNOT be installed. (Satellite Kit or PhatNoise already uses the head unit connector). ***The exception is the 2008 Mazda5 (and 2008 Mazda3's built on or after January 1, 2008) which can accommodate multiple audio components.***
4. The Auxiliary Jack is NOT an available accessory for retrofit in older Mazda's
5. The iPod Integration Module **cannot be installed** on the following models equipped **with the factory In-Dash Navigation** option:
 - Any CX-7 with 7" touch screen Navigation
 - Any CX-9 prior to 2009MY
 - 2008-2010 Mazda5

How to Use this Document

1. **Use the Chart on Page 2 to determine which Module and Harness(es) are required to install the iPod Integration Module in the Customer's vehicle**
2. **Use the Chart on Pages 3 - 5 to determine if the Customer's iPod is compatible with the required Module and Harness**
3. **Review any potential compatibility issues with the Customer prior to installation**
